

SUPPLEMENTARY FIGURES

Supplementary Figure 1. circRNA_141539 was up-regulated in ESCC cells and cell transfection. (A) qRT-PCR assay showed that circRNA_001937 was significantly up-regulated in ESCC cells, * $P < 0.05$, ** $P < 0.01$ versus Het-1A cells. (B, C) Transfection efficiency were verified by qRT-PCR. * $P < 0.05$, ** $P < 0.01$ versus corresponding NC group.

Supplementary Figure 2. Transfection efficiency of miR-4469 as determined via reverse transcription-quantitative PCR. (A) Kyse510 cells, (B) EC9706 cells. * $P < 0.05$, ** $P < 0.01$ versus corresponding NC group.
